

## **#126      Pennsylvania Strip Rubble** **(combination of blue and lilac with antique joint)**

Distinctive color shades, appealing quality and versatility has made this sedimentary rock one of our most popular among designers and architects. The variety of blue tones and other color shades such as burgundy or dark browns sets the main attraction of the stone. The strip rubble size (1"-3") of this display works great with large and small scale walls, but can be use for numerous applications. House stone veneer, columns, entrance walls to water tables, banding and outdoor projects. Bluestone is also use in a variety of floor applications, pool copings, caps and much more.

1"- 1.5" thickness , saw cut thin veneer, flats by sqft, corners by linear foot.

3"-5" Full size building stone, average of 35 Sqft. per ton.
