#242 AZTEC BLEND (with dandelion mortar joint)

When one stone by itself does not have the colors or textures desire, making a 100% customizable blend is a very good option and #242 is a perfect example, not only the percentage of each kind of stone but also the color of the joint, the shape and sizes of the stone,... etc

1"-1.5" for thin veneer, sold by sqft corners by linear foot.

Full veneer, average of 28-35 Sqft. Per ton.

Please contact our sales associates for more details. *** the stone does not come squared like the picture. The stone mason on site will have to shape it and size it as well as give it the "pillow face" effect
